

Axess
RESORT.F&B

**Integrated
solution for
restaurants,
kiosks and
shops**

Axess RESORT.F&B is the integrated solution for order and goods management of your restaurants, kiosks and shops.

RESORT.F&B can be configured individually and coordinated according to the needs of your businesses. The smart solution can be used for services ranging from kiosks to restaurants. The Axess HANDHELD 600 simplifies remote booking and save times. The convenient payment interface is adjusted according to your specific requirements, enables efficient work in live operation and only requires a short training phase. The HANDHELD also makes it possible to pay by card – no additional credit card terminal is required.

RESORT.F&B ERP lets you manage main and sub-warehouses. Stocks can easily be added or debited and you always have an overview of your warehouse storage. The creation of formulas in the Axess RESORT.F&B MANAGER offers you item management that corresponds to your existing stocks and makes it easy for you to reorder or check on inventory.

Axess RESORT.F&B

Axess **RESORT.F&B** corresponds to the tax law guidelines. In case of fiscal changes, **RESORT.F&B** is updated with just a few clicks. Report evaluation, order management, master data management, the setup of registration interfaces and stock evaluation is administered centrally in the **RESORT.F&B MANAGER**. Reports can also be sent automatically by email if desired.
